

# OCT 2020

**Donation Amount: \$3105.00**

Recently amongst other things, our donations have been used to repair Cyclone Amphan damaged homes; we're very proud to be repairing homes in two continents!

The photo above shows a typical example of the kind of repairs which the funds are allowing to take place. Brick walls and concrete foundations have replaced the bamboo walls and dirt floors that were washed away at the Bachan's home.

You can see it's not quite the standard of the normal renos we're privileged to be able to do day in day out in Australia. However the added security and comfort these works provide, make an even bigger difference for people badly in need.
